## Rawlplug Mechanical Hammer (British Made)

The bit rotating motion is unique, positive in rotation and there are no pawls or ratchets. The case is an aluminum die-casting.

The average turning speed is 120 r.p.m. giving 480 blows per minute. Power of blow can be regulated by turning the fly-nut and by reducing spring pressure the hammer can be used as a slow rotating drill.

Holes can be made  $\frac{1}{4}$  to  $\frac{1}{2}$  inch diameter to take Rawlplugs Nos. 3 to 20.

Price, complete with 2 Rawldrills Nos. 8 and 14 and Ejector ... £1 10 0

An efficient tool of light construction delivering a severe blow, this Rawlplug Mechanical Hammer is a step between an electric hammer and an ordinary hammer.

It has two four throw glass hard cams and hammer faces of hardened steel.
